OBJECTIONS YOU FACED

Nothing recorded as an unresolved objection on these two calls. Read that as empty rather than clean.

WHAT WORKED

Beacon Analytics was the call the buyer leaned into most.

■ *“Okay. This is interesting.”*

WHAT TO DO DIFFERENTLY

On Beacon Analytics you did not land: **the problem** and **the category** — the two that separate the new message from the old pitch. Say the problem out loud before you move into the product. *Done looks like*: it appears in the first two minutes of the call.

WHAT I CAN'T SEE

Tone, and the room. Also: nothing the buyer pushed back on was captured on either call.
