

Messaging analysis

WEEKLY

18–29 May 2026 · 20 calls · 14 pitches · 6 carried no product story

THE TREND

FRAMING PAIR & ENGAGEMENT, BY WEEK

ELEMENTS DELIVERED, PER REP

IS THE TEAM STICKING TO THE MESSAGE?

The framing pair — the problem *and* the category, landing together — held in **8 of 14 pitches**.

IS IT LANDING?

73/100

pitches where the framing landed · n=8

56/100

where it did not · n=6

Read that as a hypothesis, not a finding. Reps who deliver the whole message may also be working better accounts — with this many calls the two cannot be separated.

WHERE IT CAME BACK AT US

“So it takes into account the space between the events, not just the events. That's actually how I'd explain it to my board”

— Cobalt Systems · recorded, never scored
